

# neat. App Hub

## Revolutionize your workflow.

In today's rapidly evolving business environment, staying ahead involves being increasingly flexible, efficient, and productive. Neat App Hub revolutionizes your workflow, giving you unparalleled choice and control of shared workspaces.

It lets you swiftly select, deploy, and manage applications across all your Neat devices from a single dashboard. Powered by Neat Pulse, Neat App Hub ensures your team has the tools they need when they need them without the hassle of conventional setup processes.

## Built to evolve.

Neat App Hub is built to evolve by offering infinite possibilities. Leveraging our powerful Neat Pulse platform, scaling your operations and deploying new software applications becomes seamless, enabling you to meet whatever challenges you face tomorrow today.

## Centrally manage all your updates.

Say goodbye to the days of manual, on-site updates. Neat App Hub lets you efficiently manage the app's software and firmware updates centrally from Neat Pulse, saving you valuable time while reducing the risk of errors and freeing up your IT team for more essential tasks.

## Cable-free sharing for inspired teamwork.

Our pioneering and patent-pending Neat Share makes collaborating easier than ever by empowering you to bring your favorite apps into a Zoom or Microsoft Teams video meeting via a paired Neat room system. It allows you to wirelessly share content, streamline communications and improve collaboration with just a few taps for inspired global teamwork.

## Boosted productivity at your fingertips.

Boost your teams' productivity by integrating multiple apps directly onto your Neat devices. From visual collaboration tools to workspace management and tailored web applications, Neat App Hub enhances efficiency to ensure your teams have everything they need to succeed at their fingertips.

# Tap into apps.

Enjoy your favorite workplace and collaboration apps on Neat devices.\*

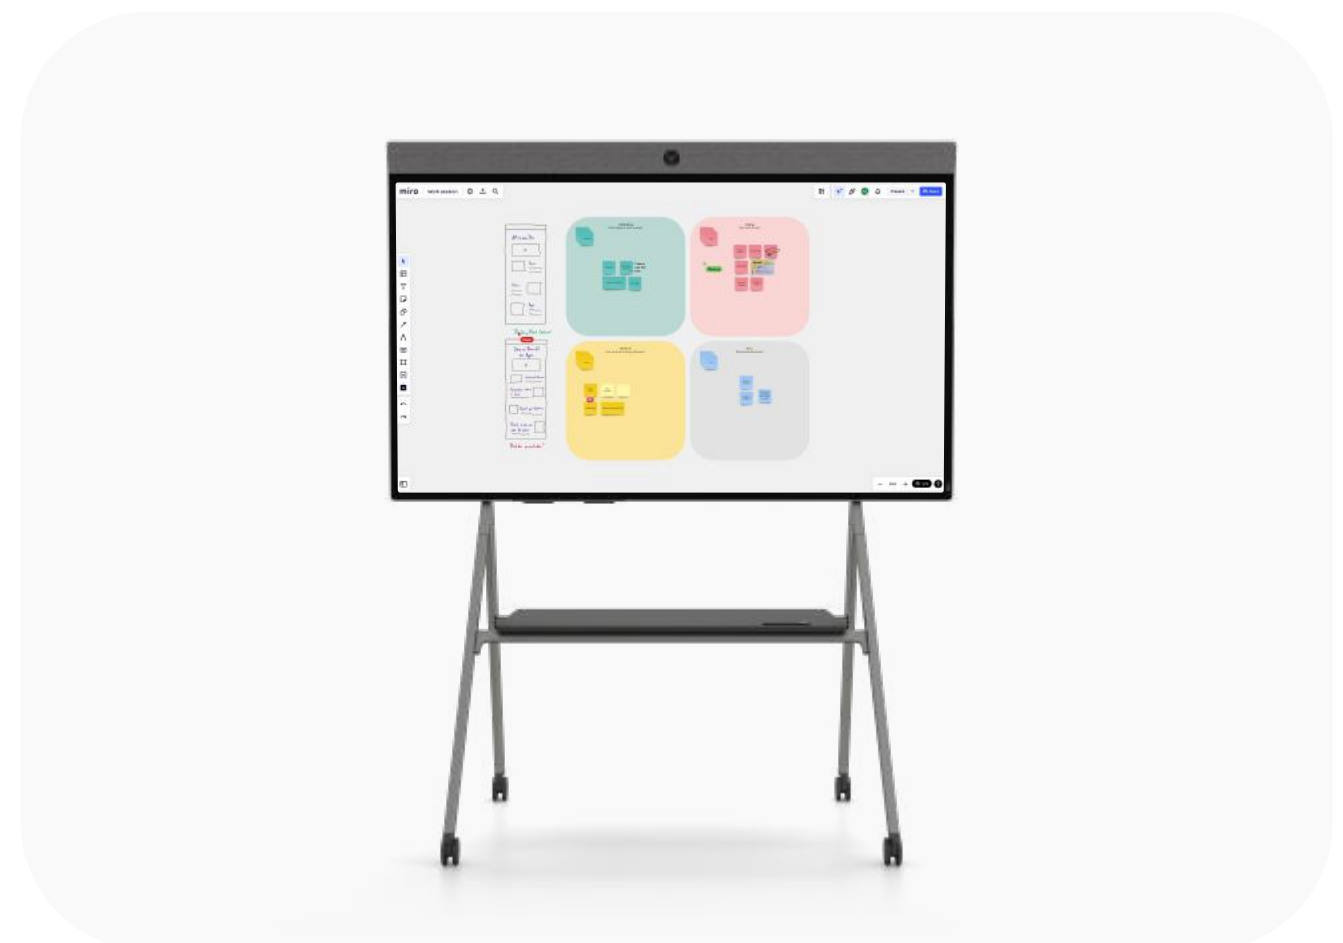

## Better workplace experience.

Optimize workspace resources across your office for better management by helping employees plan their days, reserve available work and meeting spaces, navigate spaces, see important company notifications and even check-in and track visitors.

## Greater creative collaboration.

Bring your favorite everyday workflow apps into shared spaces, enabling people to sketch ideas, make notes or highlight content, review interactive project management dashboards, or share interactive presentations with popular visual collaboration tools.

## Web apps.

Provide general browser access and designate commonly used web or custom-developed apps for your business into shared spaces. Personalize the experience depending on the space and audience.
